SIMPLY THE BEST

Model M/B II

Mounting Bracket

We don't invent antennas.
We simply build them better.

To use this Mounting Bracket on the 146/437-10 Satellite Antenna, remove the black foam grip. This allows placing the MB II Mounting Bracket behind the reflector element.

Insert the Antenna boom on the side of the angle as shown above. Then loosen the wing nuts enough to slide the clamp over your mast as shown in the first figure. Tighten the wing nuts to secure the assembly to the antenna boom and the mast.

NO TOOLS NEEDED
